## PROFESSIONAL SUMMARY

B.Voc Information Technology student with hands-on experience in web and application development. Skilled in JavaScript, React.js, HTML, CSS, Tailwind CSS, Firebase, and Git/GitHub. Experienced in developing practical projects including e-commerce, voting management, weather, and student management applications. Interested in starting a career as a Web Developer or Software Developer.

## TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS
Frontend: React.js , React Native, Vite, Tailwind CSS
Backend & Database: Firebase, Firestore, Supabase
Tools: Git, GitHub, VS Code, Android Studio
Other: REST APIs, React Hooks, Responsive Web Design, Local Storage

## PROJECTS

**Shoply E-commerce Web Application** https://shoplyy-ecommerce.vercel.app/ React.js, Vite, Tailwind CSS, Firebase, Firestore

- Developed an e-commerce web application with product browsing, categories, search, wishlist, cart, and order management.
- Integrated Firebase Firestore for persistent and synchronized user data.
- Used React Context API for application-wide state management and designed a responsive interface.

**VoteX — Voting Management System** / ***React.js, Tailwind CSS, JavaScript***

- Developed a voting management application with user and admin functionality.
- Created dashboard, candidates, election, results, and settings modules.
- Implemented reusable React components and Context API based state management.

**Student Management System** / ***React Native, Expo, Supabase***

- Developed a mobile student management application with authentication and student management features.
- Integrated Supabase for backend data storage and AsyncStorage for local data.
- Tested the application using Android Studio Emulator.

**Weather App** | HTML, CSS, JavaScript, Open-Meteo API | https://goodwhether.vercel.app/

- Developed a responsive weather application and integrated location-based weather data.
- Practiced API requests, JSON data handling, and dynamic DOM updates.

**ColorFusion AI — AI Image Colorization Web App** | React.js, Vite, Python, Machine Learning | https://color-fusion-ai.vercel.app/

- Developed an AI-powered image colorization application that converts black-and-white images into colorized images.
- Built the web interface using React.js and Vite with an interactive image upload and result-viewing workflow.
- Used Python and machine-learning techniques for the image colorization workflow and integrated the AI functionality with the web application.

**MovieHub — Movies & Entertainment** | React.js, Vite, JavaScript, TMDB API | https://movie-good.vercel.app/

- Developed a movie and entertainment web application with trending, popular, now playing, and top-rated movie/series sections.
- Integrated the TMDB API for dynamic movie data, search, genres, movie details, and entertainment discovery.
- Implemented responsive UI, reusable React components, API caching, lazy loading, and optimized image handling.

## EDUCATION

B.Voc — Information Technology | Kalyan Polytechnic | Gujarat Technological University
Currently in 5th Semester
Higher Secondary — Commerce | Vision School, Aliyabada | Gujarat Board | | Percentage: 74%

## ADDITIONAL INFORMATION

Interested in Web Development and Software Development. Currently improving skills in Flutter, Dart, databases, and application development.
